#### 16. FTP

As we have mentioned, FTP is the most common method uploading files to your website. We recommend downloading software like FILEZILLA from http://filezilla-project.org/download.php?type=client

Open up your FileZilla program and enter your

FTP Address, FTP Login and Password as shown on Figure 16. FTP URL should be

"ftp.yourdomainname.com" without the www in front. FTP Login and Password was created earlier.

\*Please make sure to update your filezilla whenever there's a latest copy.

#### 18. USING WEBMAIL

#### HORDE

Shared Linux webmail interface. Reading and sending mails have never been so easy using webmail. As long you have a computer with internet access you can conveniently access your mailbox from an internet browser.

Type in webmail.yourdomainname.com and you will see the login screen as shown at Figure 18 enter your email address as Username and Password to check your mail.

You can also check our online tutorial for further reference:

http://usonyx.net/how-to-use-webmail-in-plesk.html

#### SMARTERMAIL

Shared Windows Webmail interface. Access Email Through a World-class Webmail Interface, SmarterMail delivers an industry-leading Webmail interface for accessing email, calendars, contacts, tasks, and notes. The optimized AJAX Web interface is intuitive for Microsoft Outlook users and makes use of drag-anddrop, keyboard shortcuts, pop-up windows, snapping panes, splitters, and tab controls.

Type in webmail.yourdomainname.com and you will see the login screen as shown at Figure 18A enter your email address as Username and Password to check your mail.
